Does Jaycar offer a trickle & battery charger?

Jaycar's carefully curated range of trickle & battery chargers meets various charging requirements. Whether you need a portable power bank for your mobile device or a robust trickle charger for marine applications, our collection includes options for multiple batteries - from lead-acid to NiMH batteries.

Why should you choose Jaycar solar power?

Additionally, solar power is silent and produces no emissions, ensuring a peaceful and environmentally responsible camping experience. With Jaycar's solar power products, campers can enjoy the convenience and sustainability of harnessing the sun's energy wherever their adventures take them.

How do I charge a 12V battery?

It is easy to wire up, prevents battery discharge during low sunlight and indicates charging and full battery conditions using a yellow and green 3mm LED. 20 Amp fuse and fuse holder recommended (sold separately). Designed by German brand Kemo Electronics to efficiently charge 12V batteries using solar cells rated up to 10 Amps.

Can a solar charger be permanently mounted?

The housing can be permanently mounted using the integrated mounting holes and the IP65 weatherproof rating means it can handle a little rain. If you happen to live in areas with a cold climate, the charger can be set to provide a more effective charge in temperatures below 10°C.

Explore Jaycar's extensive range of battery chargers, designed for simplicity and ease of use. With options ranging from trickle chargers to robust solutions for larger batteries, our collection has everything you need to keep your devices ...
