

150cc scooter battery charger solar panel

Our Electric Scooter Charging Station is a complete solution for parking and charging electric scooters equipped with 800W solar panels. We strongly believe that this charging system will give a boost to the urban micro-mobility revolution.

The charging station for electric scooters and bicycles is a fully modular and autonomous product, designed for the development of micromobility in cities. Operation requiring no external power supply is possible thanks to efficient ...

Operation requiring no external power supply is possible thanks to efficient solar panels and dedicated electronics. In its default configuration, the e-scooter charger consists of 4 charging spots in the form of 2 low and 2 high poles.
