

# 2023west africa energy storage station

How has energy storage changed in 2022?

This has resulted in an increase in energy storage levels in recent years. In 2022, the continent had around 50MWh of energy storage capacity installed. Since then, energy storage capacity tripled in 2023 and then experienced another 10-fold increase in 2024. Image: AFSIA Solar.

What is the West Africa Energy Program?

The West Africa Energy Program run by US AID's Power Africa division includes support for five solar projects which will provide about 150MW of electricity, including the Koden and Nagraongo solar plants in Burkina Faso and a 250MW solar /hydropower hybrid plant in Ghana.

What are West Africans doing to improve their power systems?

West Africans are now moving in many directions to enhance their power systems. This report offers an overview of the challenges and the great profusion of activity across the region. It should inform conversation at Nigeria Energy in Lagos (19-21 September) and at the Africa Energy Expo in Rwanda next year.

How will Africa's energy system evolve?

It explores pathways for Africa's energy system to evolve toward achieving all African development goals, including universal access to modern and affordable energy services by 2030 and nationally determined contributions. The report analyses infrastructure expansion needs, investment requirements, financing options and energy policy priorities.
