

3dr solo battery bad cell replacementy

What happened to 3DR solo?

The company went Belly up in 2015 The 3DR solo app is discontinued and the 3DR servers no longer exist (so there's no way to get past the "preflight update required" screen). All of your batteries will need to be replaced, since there are no 3DR batteries for sale, you need to have a rebuilt battery made for you (soloflies.com will help you out).

Is there a way to replace a cell on a 3DR?

There is a guy who will perform the cell replacement for a fee. The stock 3DR app isn't available on app stores so you'll need to install ardupilot and use an app like Q ground control. It can still be flown, but it is more like an antique car than useful drone at this point.

What is a 3DR SOLO drone?

Released in April of 2015, the 3DR Solo is a smart drone created by 3D Robotics, an American company in Berkeley, California. 3D Robotics markets the Solo drone as the "smartest drone ever," a device geared towards simple flying and professional aerial photography and videography.

What happened to the 3DR solo app?

So to give you the quickest info about your drone... The company went Belly up in 2015 The 3DR solo app is discontinued and the 3DR servers no longer exist (so there's no way to get past the "preflight update required" screen).

How to fly a 3DR SOLO drone?

In order to fly your drone you need to install "Open Solo 4" on your drone, this is open source drone software created for the 3DR solo drone and it features many fixes and upgrades for your drone. If you are using an Android Tablet or Phone, then you need to download "Solex".

Why did 3DR go belly up?

The 3DR solo was a great idea when it was released, but suffered from some very poor execution and cost cutting (due to them trying to compete against cheaper mass made competition from China) and as a result, the company went Belly up. What you have now though is a great opportunity.
