

6.6 kW solar system with battery price

How much does a 6.6kW Solar System cost?

The typical cost of a 6.6kW solar system is around \$13,200. However, it is important to note that the prices of solar panels have come down substantially over the past 10 years, making it a more affordable option for homeowners. Source: The National Renewable Energy Laboratory (NREL)

How many batteries do I need for a 6.6kW solar panel?

The number of batteries required for a 6.6kW solar panel system depends on the type of battery chosen. If you opt for the recommended lithium polymer batteries, you will need approximately 42 kWh worth of batteries. You can choose to buy a single battery system or wire several batteries of smaller sizes together.

How much does a 6.6kW battery cost?

A 6.6kW system with a suitable size battery costs anywhere between \$15,000 - \$22,000. It depends on the quality of panels you select and the size capacity of the battery. The table below provides a price guide for different battery sizes:

Should I buy a cheap 6.6kW solar panel system?

We strongly recommend you avoid buying a cheap 6.6kW solar panel system. You will see advertisements that show a much lower cost for a 6.6kW system than what we publish; this is because we show solar panel prices for good quality, reliable systems that will last 25 years.

How much does a 6kW Solar System cost in Australia?

Solar Quotes estimates that the average cost for a 6kW solar system in Australia is currently between \$5,200 - \$8,700, including any solar subsidies and depending on installation specifics and individual components. If you're considering adding extra panels and buying a 6.6kW system, that price increases to between \$5,500 and \$9,000.

How many solar panels are in a 6.6kW system?

However, the number of panels in a 6.6kW system will vary depending on the make, model and efficiency of the solar panels, as well as the climate conditions in your specific location. 6.6kW solar systems are one of the most common solar panel sizes for home installations in Australia.

Leading technology, Perth's best prices. 6.6 kW Solar packages by PSW Energy provide an annual average close to 30 kWh (units) per day of solar generation. Combine a 6.6 kW solar energy system with a battery for broader energy ...
