

# 955 solar battery life

How long does a Garmin Forerunner 955 solar battery last?

This allows the Forerunner 955 Solar to achieve an impressive battery life of up to 20 days in Smartwatch mode with solar charging. In GPS mode, Garmin claims up to 42 hours and up to 49 hours while solar charging.

Is the forerunner 955 a good battery?

[Solar charging assumes all-day wear with 3 hours per day outside in 50,000 lux conditions] As you can see, battery life has only been improved slightly, although it's worth mentioning that the GPS chip in the new Forerunner 955 series is much better (and power-hungry) than the single-band Forerunner 945.

Is the Garmin 955 solar a good smartwatch?

The new Garmin 955 Solar version brings another element of performance to what many consider one of the best smartwatches on the market, adding the Power Glass Solar Charging lens to the screen. This allows the Forerunner 955 Solar to achieve an impressive battery life of up to 20 days in Smartwatch mode with solar charging.

Should you buy a forerunner 955 solar?

From a physical point of view, the Forerunner 955 Solar looks very familiar but adds a bigger screen with better resolution and, of course, the solar-harvesting Power Glass, which can help extend battery life, should you spend enough time training outside.

What does a forerunner 955 solar look like?

The Forerunner 955 Solar might look similar to the Forerunner 945, but there are quite a lot of physical changes between the two. The most obvious is the addition of the solar-harvesting Power Glass; you can clearly see the sunlight-sensitive ring around the watch face.

Is the Garmin Forerunner 955 a solar watch?

It's been 3 years and 2 days since Garmin announced the Forerunner 945, and today, it's finally properly refreshed with the Forerunner 955. Except, it's actually two watches - the Forerunner 955 & the Forerunner 955 Solar. Today's announcement marks the first time we've seen solar in the Forerunner family.
