

Amber solar battery

Is Amber a good solar energy solution?

Amber is not a one-size-fits-all solution. Based on this Amber electricity review, here's who's most likely to benefit: New solar + battery homeowners: Amber can help accelerate your system payback and reduce bills dramatically. Solar owners without a battery: Adding a battery and combining it with Amber can open up new levels of value.

What is amber for batteries?

Amber for Batteries is designed to help solar and battery owners maximise the value they can get from their energy set-ups, combining machine learning and control features so you can take full advantage of wholesale pricing. Exactly how much you will save and earn depends on what's going on in the energy market, your energy set-up and usage.

Does Amber charge a battery?

Usually this is great, as Amber will automatically charge your battery for you - giving you a full battery and earning you money. But negative prices have a downside - it means your solar feed-in tariff can also go negative. It's not a good feeling when Amber charges you money to export your clean solar energy to the grid: -7c/kWh feed-in tariff.

Is amber for batteries a VPP?

Technically, Amber for Batteries isn't a VPP, as you don't have to give up control of your battery to them if you don't want to. And they'll only charge or discharge your battery for your financial benefit, not theirs. Powershop offered \$10/month off my bill in return for permission to hammer my battery whenever they like.

Can I join Amber for batteries?

We need to be able to control your battery and inverter in order to be able to optimise it in line with wholesale pricing. If you have one of the following compatible batteries, you can join Amber for Batteries using Amber's SmartShift™ technology. Tesla is a great battery.

Can I use amber electric without a battery?

This post is a review of using Amber with a battery. I do not recommend using Amber Electric without a home battery. A four-point summary of my review: Year-over-year, there was virtually no difference in my bills overall being with Amber Electric compared to being with Origin Energy. I expect Amber to come out ahead over the autumn/winter period.

At Amber we want to help optimise solar and battery systems to return the most value to their owners, and the most value to the grid, so Australia can reach a 100% renewable future faster. With households at the centre of the transition. ...
