

Analysis of the incident of huge profits of energy storage power supply

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

Are energy storage losses serious?

However, in general, when energy storage participates in the electricity market, the losses are serious according to the current market mechanism, especially when the station participates in the energy market alone (the annual loss of Yixing power station was about 35.52 million USD, and that of Zhenjiang power station was about 11.6 million USD).

Does energy storage configuration maximize total profits?

On this basis, an optimal energy storage configuration model that maximizes total profits was established, and financial evaluation methods were used to analyze the corresponding business models.

Why are storage systems not widely used in electricity networks?

In general, they have not been widely used in electricity networks because their cost is considerably high and their profit margin is low. However, climate concerns, carbon reduction effects, increase in renewable energy use, and energy security put pressure on adopting the storage concepts and facilities as complementary to renewables.

What is the value of energy storage?

1. Introduction The value of energy storage has been well catalogued for the power sector, where storage can provide a range of services (e.g., load shifting, frequency regulation, generation backup, transmission support) to the power grid and generate revenues for investors .

What challenges does the energy storage industry face?

The energy storage industry faces several notable limitations and gaps that hinder its widespread implementation and integration into power systems. Challenges include the necessity for appropriate market design, regulatory frameworks, and incentives to stimulate investment in energy storage solutions.
