

# Apex agm solar battery

What does Apex Solar Power offer?

Apex Solar Power offers customers the opportunity to integrate a solar battery and EV (electric cars) charging station into their existing or new solar panels. The solar company sources backup energy solar products, including the Generac PWRCell, Tesla Powerwall, and LG Chem.

Can AGM batteries be used for solar-plus-storage?

Recently, technological advances have made them usable for solar-plus-storage setups as well. AGM stands for absorbed glass mat, one of the main physical differences between AGM batteries and traditional flooded lead-acid batteries used in cars. We'll spare you from the extensive details of everything that separates these two battery chemistries.

Are AGM batteries good for off-grid solar systems?

AGM batteries are handy for small, off-grid solar systems. For example, a remote cabin with low energy demand and a small system on the roof may be the perfect candidate for an AGM battery bank. No maintenance is needed, and the relatively low upfront cost of lead-acid batteries makes AGM batteries ideal for these smaller, off-grid setups.

Are deep-cycle AGM batteries a good choice for solar panels?

In recent years, deep-cycle AGM batteries have become available on the market. Like other deep-cycle lead-acid battery options, deep-cycle AGM products can be a solid choice to pair with a solar panel system in select cases.

Are AGM batteries safe?

AGM batteries are completely sealed, and you'll never have to check water levels or deal with expelled gas like you would in a traditional flooded lead-acid battery product. This makes AGM batteries generally a safer lead-acid option, as you can set them and never touch them again (until you need a replacement).

Which batteries are best for solar panels?

However, for most residential solar panel installations, you'll want to explore lithium-ion batteries like the Tesla Powerwall or LG Chem RESU to keep up with the high energy input from a solar panel system and the high energy demands of a household. AGM batteries are handy for small, off-grid solar systems.
