How is energy produced in Cameroon?

With a total installed capacity of 1,292 MW, the mix of energy production of Cameroon consists of 57% of hydraulic power source, 21% of thermal springs in the gas, 10% of heat source to light fuel oil and 13% of heat source to heavy fuel oil. The oil sector is managed by the national oil company Sociéte Nationale des Hydrocarbures.

Does Cameroon have a power shortage?

Cameroon has immense hydroelectric potential yet fails to meet the electricity demands of its population and businesses. Despite an estimated annual demand increase of around 85,000 new customers, the country faces a significant energy shortfall for households and businesses. Table 4 details energy consumption by sector.

What is the energy potential of Cameroon?

3.1. Government Strategies for Energy Production Cameroon's energy potential primarily comprises hydroelectricity (64%), thermal energy (30%), and other renewable energies (about 6%). The installed capacity increased from 933 MW to 1650 MW by 2020, falling short of the planned target of 3000 MW by a deficit of 1350 MW.

How much money does Cameroon need for energy projects?

The Cameroonian government states that Cameroon needs almost 2000 billion euros to finance its energy projects. These funds will support the construction of the Limbe gas power plant (350 MW), the Grand Eweng, Chollet, Kikot, Katsina Ala (285 MW), and Menchum (72 MW) hydroelectric dams, among others.

What is Cameroon's energy policy?

A critical examination of the current state and evolution of various energy sources, demand and supply, and the country's energy policy was conducted. Cameroon, aiming to become an emerging country by 2035, is heavily investing in hydroelectricity and developing other alternative electricity production sources to address the energy deficit.

Does Cameroon need a wind power plant?

Numerous studies have previously been conducted to support the growth of Cameroon's various renewable energy sources. Although a 42 MW wind power plant project is being prepared for the West region of Cameroon, wind energy is the one that interests us because it has not yet been utilized in the nation.
