

# Average BESS price per 800kW in Saudi Arabia

How many bidders are in Saudi Arabia's 8GWh Bess project?

The Saudi Power Procurement Company (SPPC) has released a list of 33 prequalified bidders for its 8GWh BESS project. The projects mark the first phase of Saudi Arabia's ambitious battery storage program. It is designed to support its 50% renewable energy goal by 2030.

How much does a Bess battery cost?

Factoring in these costs from the beginning ensures there are no unexpected expenses when the battery reaches the end of its useful life. To better understand BESS costs, it's useful to look at the cost per kilowatt-hour (kWh) stored. As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown:

How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.

What is the world's largest Bess project in Saudi Arabia?

The world's largest BESS project in Saudi Arabia is one that has received accolades from the state government. Under Saudi Arabia's Vision 2030 policy roadmap, the country aims to have a 50% share of renewable energy in its grid.

Why is Saudi Arabia focusing on Bess?

Saudi Arabia's focus on BESS is not only a response to the country's energy needs but also a strategic move to position the kingdom as a leader in the global energy storage market.

Will Saudi be the third biggest Bess market in 2026?

And if we add recent tenders, this will lead to a whopping 33.5 GWh of BESS capacity by 2026. This would make Saudi the third biggest global BESS market after the USA and China. While KSA is certainly leading the pack, increasing deployments can be witnessed all across MENA and the Gulf or GCC region in particular.
