

# Average PV energy storage price per 5MW in Portugal

Can a solar photovoltaic system integrate energy storage in Portugal?

The configuration of a solar photovoltaic system integrating energy storage in Portugal is yet unclear in the technical, energetic and economic point of view. The energy management jointly with the battery operation have great influence in the system configuration's profitability value.

How much does a solar system cost in Portugal?

The Portuguese Government came into this auction expecting to obtain 33.5 thousand euros per MWh, but the winners ended up paying to 37.1 thousand euros per MWh to the system. Also, the World record for the lowest output price was broken once again with a bid of EURO.0112/kWh. In Spain, the development of solar energy started earlier.

Is energy storage more attractive in Portugal than in Spain?

The energy storage appears to be more attractive in Portugal than in Spain since the storage bids are granted a capacity payment in exchange for hedging the Portuguese electricity system against high market prices.

Is self-consumption suitable for PV solar energy in Portugal?

All the configurations implemented self-consumption, considered to be the current most adequate context to implement PV solar energy in Portugal in the residential sector, regarding the Portuguese legislation.

Why is solar energy so expensive in Portugal?

Portugal faces some of the highest electricity prices in Europe, driven by taxes and network costs. With rising electricity costs making it more expensive to power appliances, heat water, and cool homes, solar energy offers a cost-effective solution.

What is Portugal's PV capacity?

The country's cumulative installed PV capacity now stands at 5.66 GW, as it works toward a revised 20.8 GW target by 2030. Researchers in Portugal have simulated 800 power purchase agreements across eight different contract types and have found that contracts with a variable price structure achieve higher performance.
