

Average commercial energy storage price per 30MW in Spain

What is Spain's battery storage market?

Spain's battery storage market is dominated by customer-sited systems. Utility-scale storage remains nascent. Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average.

Is the capacity market a good investment in Spain?

The capacity market in Spain represents an opportunity for the storage sector but cannot be considered the sole basis for investment. Its design must be complemented by a diversification strategy in other electricity markets to ensure the profitability and sustainability of projects.

What is Spain's energy storage strategy?

Spain's government has approved an energy storage strategy that it says will put the country "at the forefront" of what is being done in Europe and help it move towards its 2050 climate neutrality target. The roadmap foresees the country ramping up its storage capacity from the current 8.3GW level to 20GW by 2030 and then 30GW by 2050.

Is combining solar and storage a good idea in Spain?

This variability, combined with Spain's excellent solar resources, make the economics of combining solar with storage increasingly favorable. The market for utility-scale batteries has been almost non-existent until recently as the market has lacked a clear policy and regulatory framework.

Will Spain achieve 20GW of storage by 2030?

In addition, Spain has developed a national storage roadmap that includes a target to achieve 20GW of storage by 2030. However, current levels of customer-sited storage adoption already exceed its 2030 targets.³⁷ To date, neither has been sufficiently attractive to mobilize investments at scale.

How is the capacity market developing in Spain?

The development of the capacity market in Spain has progressed in recent months with the publication of a public consultation in December 2024. The process is currently following these steps: Public consultation: Recently concluded after a six-week period, during which feedback was received from various industry stakeholders.

Discover the comprehensive breakdown of 1 MW battery storage cost, ranging from \$600,000 to \$900,000. Learn how Maxbo's tailored energy solutions cater to Europe's energy demands, ensuring cost-efficiency and sustainability. Explore ...
