

# Average domestic energy storage price per 20kW in China

What is China's energy storage capacity?

China has total energy storage capacity of about 35 GW as of 2020, of which only 3.3 GW was new energy storage, according to the China Energy Storage Alliance.

How big is China's power storage industry?

Industry estimates show that China's power storage industry will have up to 100 million kilowatts of installed capacity by 2025, and 420 million kW installed capacity by 2060, attracting related investment of over 1.6 trillion yuan, said Li Jie, general manager of power storage at State Grid Integrated Energy Service Group Co Ltd.

How much energy does the residential building sector consume in China?

In China, the residential building sector consumed 338.43 million tce, accounting for 11% of the national overall energy consumption and ranked second across all sectors in 2009. This proportion will even increase further in the future.

How much battery storage does Germany have?

Residential storage accounted for 88% of new installations in both Q3 and year-to-date figures (by energy capacity). By September 2024, Germany's cumulative battery storage installations totaled 10.3 GW/15.9 GWh, with residential systems making up 85% of the total.

How big is non-hydro energy storage in 2024?

In the first three quarters of 2024, newly operational non-hydro energy storage installations reached 20.67 GW/50.72 GWh, representing year-on-year growth of 69% in power capacity and 99% in energy capacity.

How much battery storage does the UK have in 2024?

United Kingdom: Q3 Marks Installation Peak for 2024 As of September 2024, the U.K. reached 4.3 GW/5.8 GWh in cumulative operational battery storage, with an average duration of 1.33 hours. In the first three quarters, 19 new battery projects totaling 579 MW were added, a year-on-year decline of 52%.
