

Average flow battery system price per 5MW in Australia

How much do solar batteries cost in Australia?

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and installation factors. Here's a breakdown of average prices.

Are Australia's big battery costs coming down?

Image: EnergyAustralia. The Riverina and Darlington Point BESS. The developers of Victoria's first four-hour big battery say the costs of building large-scale battery energy storage are coming down in Australia, as demand grows and the dynamics of the global supply chain start to settle.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

How does battery capacity affect cost per kWh?

An important trend to observe is that as the battery capacity increases, the cost per kWh decreases. This reflects the fact that many of the installation costs are fixed (regardless of what size battery is going in).

How much does a battery rebate cost in Australia?

In early 2025, the federal government of Australia announced a \$2.3 billion battery rebate scheme, launching on 1st July 2025. This program will deliver rebates of approximately \$370 per kWh, or around 30% off the battery installation cost.

Are battery energy storage systems worth the cost?

Battery Energy Storage Systems (BESS) are becoming essential in the shift towards renewable energy, providing solutions for grid stability, energy management, and power quality. However, understanding the costs associated with BESS is critical for anyone considering this technology, whether for a home, business, or utility scale.

But when measured per 100,000 residents, installations cluster unevenly across jurisdictions. South Australia, the Australian Capital Territory and the Northern Territory each exceed the national average of 478 installations ...

Solar battery prices in Australia vary significantly depending on several factors, including the brand, storage

Average flow battery system price per 5MW in Australia

capacity, installation complexity, and your location. The following table outlines average installed costs for popular system sizes in ...
