

# Average grid tied storage system price per 50kW in Canada

What is a grid tied solar system?

What is a grid-tied solar system? A grid-tied electrical system, also called tied to grid or grid tie system, is a semi-autonomous electrical generation or grid energy storage system which links to the mains to feed excess capacity back to the local mains known as the electrical grid.

How do I see individual components of a unbound Solar Grid-tie system?

To see individual system components, click on Unbound Solar grid-tie systems below. ROI or Return on Investment on Solar. These figures are based on complete solar power systems that Unbound Solar sells. Prices are approximate. Prices do not include racking, batteries, freight, tax, or installation.

What is the most expensive part of an off-grid system?

The battery is typically the most expensive part of an off-grid system. High-quality lithium batteries are the most popular choice for Canadian homeowners because of their long lifespan, efficiency, and reliability. Common options include lithium-ion batteries, 12V LiFePO4 batteries, and deep cycle solar batteries.
