

Average household energy storage price per 500MW in Belgium

How much does electricity cost in the EU?

The EU average price in the second half of 2024 -- a weighted average using the most recent (2023) consumption data for electricity by household consumers -- was EUR0.2872 per KWh. Figure 2 depicts the development of electricity prices for household consumers in the EU since the first half of 2008.

Which European country has the most expensive electricity?

Belgium is among the European countries with the most expensive electricity. The difference between the price of electricity with and without taxes is EUR 0.0949 tax for each kilowatt hour, thus, 28.29% of what households pay for electricity in Belgium.

How renewables are affecting Belgium's power supply?

Renewables--especially wind and solar--are rapidly increasing their share of Belgium's power supply. In 2023, wind and solar accounted for roughly one-third of the electricity mix, a significant jump from the previous decade. Offshore wind in the North Sea is a particular success story, with Belgium now among Europe's leaders in offshore capacity.

Where do electricity companies buy electricity in Europe?

Most electricity companies in Europe buy electricity on a common market place, such as Nord Pool. All power plants that produce electricity and electricity companies that supply electricity to homes and businesses meet there. Based on supply and demand, prices are set for each hour and each area, one day in advance.

How much electricity does a household consume a year?

Throughout this article, references to household consumers relate to the medium standard household consumption band with an annual electricity consumption between 2 500 KWh and 5 000 KWh. All figures are consumer retail prices and include taxes, levies and VAT.

Which EU countries have the lowest electricity prices?

Non-household electricity prices in the EU were highest in Cyprus (EUR0.2578 per KWh) and lowest in Finland (EUR0.0767 per KWh) in the second half of 2024. This article highlights the development of electricity prices both for household and non-household consumers within the European Union (EU).
