

Average hybrid renewable storage price per 100kW in Romania

Are energy storage technologies commercially available in Romania?

This study investigated the feasibility of energy storage technologies that are commercially available on the Romanian market by using the levelized cost of storage (LCOS) method. The proposed approach also considers subsidies and different battery energy storage system' (BESS) technical parameters.

How much solar energy is injected into the grid in Romania?

As shown in Fig. 1, the share of RES in the total amount of electricity injected into the grid by the dispatchable producers increased from 35.4 % in 2013 to 44.39 % in 2020. Fig. 1. Romania electricity mix . In 2019 the Romanian Parliament adopted the prosumer law to encourage the increase of solar electricity injected into the grid.

How much does electricity cost in Romania?

The electricity price considered for Romania is 0.1734 EUR/kWh, which is the average price in the first quarter of 2021, according to EU statistics . Thus, the LCOS values must be less or equal to the aforementioned threshold to be cost efficient and considered a profitable investment for the BESS's owner.

How much LCoS does a battery cost in Romania?

To be considered profitable, the LCOS of the battery must be less or equal to electricity unit price paid by the customer. The electricity price considered for Romania is 0.1734 EUR/kWh, which is the average price in the first quarter of 2021, according to EU statistics .

Should electricup beneficiaries buy a battery energy storage system?

Considering that "ElectricUp" beneficiaries can purchase a battery energy storage system (BESS) at a reduced price and combining this with the lower cost of each surplus kWh injected into the grid, the option of integrating a BESS becomes more attractive.

Where can I buy a Bess battery in Romania?

If the BESS may be purchased directly from the manufacturer in some countries, most manufacturers do not have retail stores in Romania. The battery is purchased from either the distributor, who can offer free shipping, or from the manufacturer with stores in other countries and adds the costs for shipping.

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development ...
