

## Average hybrid renewable storage price per 30kW in Spain

Can battery storage systems be retrofitted in Spain?

The first solution is battery storage systems that enable peak shift, i.e. feeding electricity into the grid at times when the wholesale price is higher, usually before and after sunset. Fortunately, the retrofitting of battery storage systems in Spain is unproblematic from a regulatory perspective.

Will Spain achieve 20GW of storage by 2030?

In addition, Spain has developed a national storage roadmap that includes a target to achieve 20GW of storage by 2030. However, current levels of customer-sited storage adoption already exceed its 2030 targets.<sup>37</sup> To date, neither has been sufficiently attractive to mobilize investments at scale.

Which European countries have pumped storage hydropower projects?

Among these, the IEA highlighted Spain and Austria within the European Union, which together account for 3.3 GW of pumped storage hydropower projects, even though they are much smaller countries than the Asian giant.

How many independent storage projects are awaiting grid connection?

According to IEA data, there are currently 540 GW of independent storage projects worldwide that are awaiting grid connection. The vast majority of these storage projects are still at an early stage or being explored.

Spain's electricity prices are influenced by the European Union's energy market and its transition towards renewable energy. On average, the cost of electricity for households can range from 0.22 to 0.28 EUR per kWh, but it's important to ...
