

Average industrial energy storage price per 1MW in China

How much does a 1MWh battery energy storage system cost?

For a 1MWh battery energy storage system, Energetech Solar offers a system with a price of \$438,000 per unit for a 500V - 800V system designed for peak shaving applications. There are also quantity discounts available, with the price dropping to \$434,350 for purchases of 3 - 9 units and to \$431,000 for purchases of 10 or more units.

How much does a battery cost in China?

The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh. In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows again.

How big is China's power storage industry?

Industry estimates show that China's power storage industry will have up to 100 million kilowatt of installed capacity by 2025, and 420 million kW installed capacity by 2060, attracting related investment of over 1.6 trillion yuan, said Li Jie, general manager of power storage at State Grid Integrated Energy Service Group Co Ltd.

What is China's energy storage capacity?

China has total energy storage capacity of about 35 GW as of 2020, of which only 3.3 GW was new energy storage, according to the China Energy Storage Alliance.

How much does a battery storage system cost?

While it's difficult to provide an exact price, industry estimates suggest a range of \$300 to \$600 per kWh. By staying informed about technological advancements, taking advantage of economies of scale, and utilizing government incentives, you can help reduce the overall cost of your battery storage system.

What factors affect the cost of a storage system?

Battery technology: The type of battery technology used in the storage system plays a significant role in the cost. Popular battery types include lithium-ion and LiFePO₄, with varying costs and performance characteristics. **System size and capacity:** The larger the storage system, the higher the cost.

In 2024, the cost per kWh of BESS systems dropped by 40% year-on-year from 2023, now averaging \$165/kWh - less than half the price seen just five years ago. In China, prices have fallen even further, with bids for a large-scale system ...
