

# Average lithium iron phosphate battery price per 10MW in China

How much does a lithium iron phosphate battery cost?

Generally, the lithium iron phosphate battery price stands between \$600 to \$800. The price bracket of a 24V LiFePO<sub>4</sub> battery is not different from a 12V battery. However, an increase or decrease in capacity can differentiate the price. It also ranges between \$600 to \$900, in 200AH capacity.

What is a lithium phosphate battery?

Lithium iron phosphate (LFP) and lithium nickel manganese cobalt oxide (NCM) are two types of rechargeable batteries commonly used in electric vehicles and renewable energy storage. With minor processing, the average price of battery cells per kilowatt-hour in US dollars, not adjusted for inflation.

Is lithium iron phosphate a good battery?

Lithium iron phosphate, commonly known as LiFePO<sub>4</sub>, is becoming increasingly popular due to its safety, long lifespan, and durability. It can be a positive change for your electric devices as it does not need maintenance and frequent change. However, lithium iron phosphate battery price is 3 to 4 times higher than traditional batteries.

How much does a lithium carbonate battery cost?

Similarly, the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024. This article focuses primarily on two of the most sought-after Li-ion battery cathode chemistries in the automotive industry today -- NCM811 and lithium iron phosphate (LFP) batteries.

How will competition affect lithium iron phosphate battery prices?

**Market Competition:** The entry of new players and increased competition in the LiFePO<sub>4</sub> battery market can put downward pressure on prices. Industry experts predict that lithium iron phosphate battery price per kWh could decrease by 30-50% over the next five to ten years.

How much does a LiFePO<sub>4</sub> battery cost?

Raw Material LiFePO<sub>4</sub> battery combines lithium materials like lithium, cobalt, nickel, and graphite. The prices of materials like lithium cobalt oxide (LCO) are around \$50 to \$60 per kg, lithium iron phosphate (LFP) costs around \$15 to \$20 per kg, and lithium nickel manganese cobalt oxide (NMC) costs \$25 to \$35 per kg.
