

# Average microgrid storage price per 50kWh in Portugal

Does Portugal have a green energy plan?

Portugal is building one of the cleanest and smartest electricity systems in Europe. Between surging renewables and flexible tariffs, it's never been easier for households and businesses to go green -- and save money doing it. Time to rethink your energy plan?

How much does a grid connection cost?

The complexity of grid connection requirements varies significantly based on location and local regulations, with costs ranging from EUR50,000 to EUR200,000 per MW of capacity. System integration expenses cover the sophisticated control systems, energy management software, and monitoring equipment essential for optimal battery performance.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years.

1) Total battery energy storage project costs average €580k/MW. 68% of battery project costs range between €400k/MW and €700k/MW. When exclusively considering two-hour sites the median of battery project costs are €650k/MW.
