

Average nickel manganese cobalt battery price per 500kW in New Zealand

How much does a lithium nickel cobalt battery cost?

Lithium nickel cobalt aluminum oxide (NCA) battery cells have an average price of \$120.3 per kilowatt-hour(kWh),while lithium nickel cobalt manganese oxide (NCM) has a slightly lower price point at \$112.7 per kWh. Both contain significant nickel proportions,increasing the battery's energy density and allowing for longer range.

How much does cobalt cost in 2022?

For example,the price of cobalt has fallen from roughly \$70,000 per metric ton in 2022 to about \$30,000 in 2024. Similarly,the price for lithium carbonate has fallen from a high of approximately \$70,000 per metric ton to well below \$15,000 in 2024.

Why is NCM a tight lid on battery production?

A combination of lower critical battery raw material prices,supply glut,a sluggish demand and improving technologyhas kept a tight lid on NCM [...]Already a subscriber?

Notes Data until March 2023. Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted average across all sectors. Nickel prices are based on the London Metal Exchange, used here as a proxy for ...
