

## Average on grid solar storage price per 10kWh in Czech

How much does a power plant cost in China?

The price difference compared to the peak at the end of 2022 is almost a fifth, precisely one hundred thousand crowns. Currently, such a power plant costs approximately 400,000 CZK. The state continues to provide subsidies, which may cover up to half of the amount.

Is there a potential for solar installations in Europe?

There is a huge potential for solar installations, with ideal climate conditions and substantial funding coming from the EU. The situation is similar in other areas of Central and Eastern Europe, where Wattstor has already completed a number of successful renewable energy installations - such as Poland, Croatia and Slovakia.

Can rooftop solar panels be utilised in the UK?

For example, in the UK we recently worked with pharmaceutical distributor, Mawdsleys, to maximise the installed capacity of their rooftop solar panels. Because of grid constraints, Mawdsleys' solar panels could only generate about 40% of the plant's required power.

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits ...
