

Average portable ESS system price per 50kWh in Chile

How can Chile keep up with the changing energy demand landscape?

Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO₂. In March 2024, BESS Coya, the largest battery-based energy storage system in Latin America, started operations.

How many Bess projects are there in Chile?

This momentum is reflected in the data: AMI estimates that there is a 7.7 GW pipeline of BESS projects in Chile, far and away the most advanced front of the meter (FTM) storage market in Latin America. Only 505 MW of BESS projects are currently operational in the entire region.

How much storage capacity will Bess have per day?

"Once BESS Coya, BESS Tamaya and BESS Capricornio come on stream, we will have more than 1.1 GWh of storage capacity per day," Juan Villavicencio, Managing Director Renewable at Engie Chile, said as cited by Renewables.com.
