

# Average solar diesel hybrid storage price per 150MW in Sweden

How much does a PV system cost in Sweden?

The total price was 11.70 SEK/Wp. There have been some significant changes in the Swedish residential PV market between 2020 and 2023, for example, the size of the annual market and the number and size of companies working with PV system installations.

How much power does a PV system have in Sweden?

The official statistics provided by grid operators and collected by the Swedish Energy Agency only classify PV system sizes (power) into three ranges: 0-20 kW, 20-1000 kW, and >1000 kW. Table 7 summarises the total installations at the end of 2023 based on this data source.

Are solar PV parks a good investment in Sweden?

Solar PV parks being rolled out above 100 MW do not seem far away, which will likely allow PV parks in Sweden to gain market share more quickly in terms of the total market. In summary, there may be some hurdles in the short term, but in the long term, the Swedish PV market is well-positioned for growth.

Why did PV module prices drop in Sweden?

A significant drop in PV module prices in Sweden due to the growing domestic market, which enabled retailers to import larger quantities, and due to the general global price decline closely tied to the advancements in mass-production of PV modules and technology development which led to the use of less material and energy per kWp of PV capacity.

How much solar power does Sweden have in 2023?

This surge includes approximately 67.6 MW from centralized ground-mounted PV parks and 1 533.3 MW from distributed PV systems, predominantly for self-consumption. Total Installed PV Capacity: By the end of 2023, Sweden's total installed PV capacity reached nearly 4 000 MW, a 67% increase from the previous year.

What drives the PV market development in Sweden?

This leaves the centralized, commercial, public, and industry segments relying purely on market incentives such as utilities buying PV electricity above spot-market price and guarantees of origin as possibilities for extra revenues. Generally, self-consumption business models and corporate PPAs are driving the PV market development in Sweden.
