

# Average solar plus storage price per 8MW in Romania

Does Romania have a battery energy storage plan?

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch.

How much solar energy does Romania need?

In the context of the European ambitions, Romania would need to aim for 44.4% RES, meaning 11.1 GW of solar - 6.1 GW for utility-scale and 5 GW for rooftop PV. Drivers for solar growth The last two years have been marked by significant legislative changes that underpinned the development of the Romanian PV sector.

How much will Romania spend on solar projects?

Around EUR372.7 million of the total will be devoted to projects exceeding 1MW in size and EUR75 million to wind and solar plants with a capacity between 200kW and 1MW. The Romanian authorities will grant a rebate of EUR750,000 per MW installed to PV projects with a power of 200kW to 1MW and of EUR425,000 per megawatt installed to solar arrays over 1MW.

Does Romania have a solar PV project in 2023?

Overview of solar PV developments Following a period of lull, Romania has achieved in 2023 a significant milestone in its renewable energy journey - over 1 GW of new solar capacity installed in one year between distributed generation and utility scale projects.

What is Enery doing in Romania?

This week, Vienna-based Enery has commissioned a major solar and storage site in northwestern Romania. The project consists of a 51.4 MW PV plant and a battery energy storage facility of 22 MWh.

Is Romania a good country for solar energy?

National targets for solar PV With an average of 1,900 to 2,400 annual sunlight hours, Romania has significant natural potential for solar PV development. Yet, the country has not set ambitious targets for renewable energy sources, aiming for only 30.7% of its final energy consumption to come from RES by 2030.
