

Average solar with battery price per 10MW in Ireland

How much does a solar battery cost in Ireland?

A solar storage battery is a device that stores the extra electricity your solar panels produce. It allows you to use this stored energy later when the sun isn't shining, like during the evening or on cloudy days. The cost of adding a solar battery to your PV solar panel system in Ireland can range from EUR1,500 to EUR4,000.

How much does a solar PV system cost in Ireland?

A solar PV system costs between EUR4,600 - EUR8,700 in Ireland in 2025 with the SEAI grant. The exact price will depend on the number and type of solar panels used. You can expect the peak solar output of your solar PV system to be between 1.76kWp to 7.04kWp.

How much does a solar panel battery cost?

The main factor that influences the cost of a solar battery is its capacity with 5kW batteries costing between EUR2,000 to EUR3,500, while larger, 10kW batteries costing between EUR4,500 to EUR7,000. Unlike solar panel installation, there are no SEAI grants available for the purchase of solar batteries.

How long does a solar battery last in Ireland?

The average payback period for a solar battery in Ireland is around 6-12 years. It's important to choose a high-quality battery with the right capacity and features for your needs. Adding a solar battery storage system to your PV solar panel system in Ireland can be a valuable investment.

How much energy does a solar system use in Ireland?

Well, the average Irish household uses around 4,200 kWh of electricity per year. If you really want to get value out of your new solar system, you should aim to cover at least 75% of your energy consumption - meaning that average home would need 8-10 panels, most likely with a 4kW system or higher.

How much does a battery storage system cost in Ireland?

In Ireland, adding a battery storage system to your solar panel setup typically ranges from EUR4,000 to EUR8,000. The usable capacity of these batteries is usually around 3.8-13.5 kWh, with power charge/discharge rates of 2.0-5.5 kW.

5 · A good rule of thumb is that a solar system should aim to cover at least 75% of your electricity usage, so this means the average household would require approximately 8 to 10 panels, at a cost of around EUR5,300 - EUR6,600 (with grant).

Solar panels in Ireland are a great investment and can pay for themselves in just 5-6 years. After that, it's free electricity all the way. Most of our customers generate more electricity than the average Irish household consumes each year.

Average solar with battery price per 10MW in Ireland

We have pre-populated the calculator with figures for a typical installation here in Ireland. Adjust these figures to your own circumstances to see if a battery makes financial sense for you. Keep in mind: this calculator works for any battery from ...
