

# Average wall mounted battery price per 50kWh in Australia

How much does a 50kWh solar battery cost in Australia?

Still, 50kWh is often a sweet middle ground that covers most use cases without overinvesting. As of 2025, prices for a 50kWh solar battery in Australia start from around A\$33,499, depending on the brand, battery chemistry (like LFP or NMC), and whether it's a modular or all-in-one unit. Prices can vary based on:

What size solar battery should I buy in Australia?

A 13kWh battery (or thereabouts) is the most popular choice for Australians looking to maximise their solar system as a battery this size could power your home for hours. As we can see from the table below, the most installed batteries in Australia today are around 10kWh for this reason: Do brands affect solar battery cost in Australia?

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

How long does a solar battery last in Australia?

With a lifespan of 10-15 years, a battery can generate \$10,000-\$15,000 in savings over its life -- while protecting you from rising energy prices and blackouts. Solar batteries are becoming increasingly accessible in Australia, especially in 2025 with robust government rebates and rising energy costs.

How much does a solar battery cost in NSW?

Here's a look at what's available: The NSW Government Solar Battery Rebate launched on 1st November 2024. It offers between \$1,600 and \$2,800, depending on your battery size and eligibility. This makes NSW one of the most supportive states for homeowners adopting battery storage.

Why is the solar battery price falling in Australia?

Thanks to many innovators (some who've now got their sights set on Mars), the solar battery price in Australia has plummeted. Supply chain issues due to COVID have definitely curbed that trend recently, but as the world emerges from lockdowns, the solar battery price has started to decline once again.
