

Average wall mounted battery price per 800MW in Germany

What is the German solar battery storage price monitoring?

The German Solar Battery Storage Price Monitoring summarizes price data of the most important battery storage market segments. To that end, EuPD Research interviews 80 solar installation companies and summarizes developments in a price index. In addition, the following data is gathered in the German Solar Battery Storage Price Monitoring:

Is battery storage a trend in Germany?

Remarkably, this share surged to 77% in 2023, indicating a significant upward trajectory of the trend toward combining PV residential rooftop systems with battery storage in Germany. To date, most battery storage systems in the German electricity system have been used exclusively to optimize self-consumption.

Are rooftop PV systems paired with battery storage in Germany?

In 2019, 46% of all commissioned residential rooftop PV systems had already been paired with battery storage systems. Remarkably, this share surged to 77% in 2023, indicating a significant upward trajectory of the trend toward combining PV residential rooftop systems with battery storage in Germany.

How much does a battery storage unit cost?

Battery storage units come in various types, with lithium-ion batteries leading the European market due to their efficiency and longevity. For residential installations, entry-level lithium-ion systems (5-10 kWh) typically range from EUR4,000 to EUR7,000, while premium models can reach EUR12,000.

What data is gathered in the German PV price monitoring?

The data stems from interviews with solar installation companies and an evaluation of offers made to end consumers on online portals. The following data is gathered in the German PV Price Monitoring: Split of turn key costs of < 30 kWp rooftop systems in different cost components.

What is the future of solar power in Germany?

Sustained growth is forecasted in the market for new PV capacity for years to come. Concurrently, battery systems are expected to reach a capacity of at least 100 GWh by 2030, reflecting a transformative shift within the German energy system towards renewable energy integration.
