

Average wind solar storage price per 100MW in Netherlands

How much will the Netherlands spend on solar & wind?

Overall, combining the analysis for both solar and wind, our analysis indicates that a total of EUR 18.3bn is expected to be spent by companies in the Netherlands between 2024 and 2030. This translates to an installed capacity that is expected to increase by 17.4 GW by 2030, which compares to only around 12GW between 2015 and 2022.

How much wind power should be installed in the Netherlands?

RIJUD OERLEMANS, Rijksdienst Voor Ondernemend Nederland (RVO). The Netherlands. ruud.oerlemans@rvo.nl. At the end of 2024, about 4.5 GW wind power should be installed in the Dutch part of the North Sea according to the first road map.

What are wind and large-scale solar capacity targets for the Netherlands?

Wind and large-scale solar capacity targets for the Netherlands in 2030 are based on climate policies and ambitions as set out by the "Klimaat- en energieverkenning" (KEV) 2022 and the Coalition Agreement. Accordingly, we adopt the capacity targets as set in the National Plan Energy System (see more here).

Are wind PPAs more expensive than solar?

On average, wind PPAs are forecast to reach higher prices than solar across Europe. For a 10 year pay-as-produced standard PPA starting in 2025, wind prices are expected to be the lowest in countries such as Spain, Norway, Ireland, the Netherlands, and Sweden, all with an average forecast price below [Log in or register to access precise data.](#)

How much does a network cost in the Netherlands?

However, businesses often pay higher absolute network fees due to larger capacity connections. In sum, an average Dutch household's retail price (with fixed contract) might break down roughly into ~30-40% commodity cost, ~25-35% grid fee, ~30-33% taxes, plus 21% VAT on top of all of that.

How to assess the investment plans for wind and solar in the Netherlands?

In order to assess the investment plans for wind and solar in the Netherlands by European utility companies we rely on the investment plans of the large publicly-traded companies and we use the company's existing market share (as per BNEF) to estimate what would be the overall investment if all companies would follow similar investment plans.

Whether considering large floating installation vessels or common tugs, cyclic variations in regional wind and oil and gas activity can have a significant effect of price. Large turbine and foundation jack-up vessels are typically purpose-built ...
