

# Average wind solar storage price per 10MW in Vietnam

How much does Vietnam pay for wind power?

On September 2018, Vietnam increase the FIT from 7.8 to 8.5 US cents/kWh for onshore, and 9.8 US cents/kWh for offshore wind power projects, according to Decision No.39/2018/QĐ-TTg. The FIT is implement from 1 Nov 2018 and will be valid for 20 years from the commencement of the wind projects.

How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

How much does a wind farm cost in Vietnam?

The wind farm consists of 62 1.6MW turbines which generate 320 million kWh per year. The total investment cost is VND 5,200 billion (USD 228.9 million equivalent). In Phase 1, the project paid an interest rate of 8% for the debt financing of the Vietnam Development Bank (VDB).

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.

What are standard solar and wind power plants?

Standard solar and wind power plants are plants that have operated, are under negotiation or are selected during the year (N-1). Electricity generation price of newly built solar and wind power plants is determined based on:  
b) The financial internal rate of return (IRR) is 12%.

What are the requirements for a battery project in Vietnam?

The Vietnamese authorities also decided that battery projects under the FiT scheme must have at least 10% of a PV plant's capacity and offer at least 2 hours of storage. According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024.

Maxbo Solar's latest achievement is the implementation of a groundbreaking 10 MW battery storage project. This initiative highlights the practical application and benefits of modern battery storage technology. In this article, we explore the ...
