

How will Bess work in Ireland?

Ireland is targeting a renewable energy mix of 70% by 2030 and the BESS projects will help to integrate more renewables on the grid. Frequency response services well-suited to batteries have made Ireland a relatively advanced market for battery energy storage relative to its size.

Which Bess projects are taking steps forward in Ireland?

Indeed, a number of BESS projects in Ireland have taken steps forwards recently as the sector expands, including NTR battery storage project totaling 22MW securing ten-year contracts for the supply of grid capacity to the Irish grid system and RWE's largest battery storage project to date entering full operations in County Monaghan.

Which energy company is launching a Bess system in Ireland?

Last July, Neoen Renewables Ireland Ltd, a French renewable energy company, announced a 149.6MW BESS on an 8.5ac site near Portarlinton, Laois. Just last week, the ESB opened a 75MW/150MWh BESS at the Poolbeg Energy Hub in Dublin. The system is Ireland's largest so far and is part of its EUR300m BESS portfolio.

How many Bess projects are there in Ireland?

Currently, around 17 BESS are connected to the grid, with many more filtering their way through the planning system around the country. Over the past number of weeks, the Irish Farmers Journal has been contacted by a number of farmers who have been approached by developers looking to build BESS projects on their land.

What challenges does Ireland's Bess market face?

According to Bobby Smith, head of Energy Storage Ireland (ESI), one of the main obstacles Ireland's BESS market faces is the lack of route to market for battery operators. "A lot of energy storage has crept under the radar so far in Ireland," he told ESS News. Developers secure planning quite easily but the route to market is a challenge.

Will Ireland see a battery energy storage boom in 2030?

The Single Electricity Market (SEM) in Ireland is set to see a battery energy storage system (BESS) boom into 2030, with short-to-medium duration capacity forecast by Cornwall Insight to increase fivefold by 2030.
