

Battery and solar package

What is included in a solar package?

Solar packages include everything you need to get your residential system up and running. Simply determine your required energy use and select the solar kit that is right for your home. SunWatts can help you find and install the perfect solar kit for your home.

What is a complete solar system kit?

Complete solar panel system kits that are the most energy efficient and reliable on the market today. Solar packages include everything you need to get your residential system up and running. Simply determine your required energy use and select the solar kit that is right for your home.

Should I buy a battery with my solar kit?

Purchasing a battery along with your solar kit offers a pathway to energy independence from your utility company, especially when they provide a meager buyback rate for surplus energy you send to the grid. With a battery storage system in place, excess solar energy can be stored instead of sold to the utility for low rates.

What is a solar battery backup system?

Solar battery backup guarantees a power source-- even during a grid service failure or natural disaster. When the grid goes down, a solar battery backup system automatically detects and transitions your solar system from grid power to backup power. Protect your home from outages with our solar battery backup kits. Shop What's in a kit? FAQ

How do solar battery kits work?

Solar battery kits give you everything you need to power your home and keep it running during a grid outage. When utility power is available, your solar panels generate electricity that can roll back your energy bill. If the power goes out, the system draws energy from the battery bank to keep your most important electrical loads running.

Why do you need a solar battery kit?

The benefits of having a solar battery kit extends beyond power backup. Solar battery systems efficiently store excess energy generated by your solar panels, allowing you to tap into this resource during peak hours when utility rates are at their highest.

Solar panels require direct sunlight to produce solar energy. You'll need to add a solar battery storage device to your solar system if you'd like to use solar power at night or on overcast days. Storing solar energy and drawing on your battery's ...

On top of standard battery benefits, the Powerwall 3 is great for: Larger homes with 10 - 36 solar panels. Optional home backup protection, so even if the grid goes down, your power stays on. Installation even on
