

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

Can battery storage help reduce energy bills in Ireland?

As energy prices remain unpredictable and solar adoption continues to grow, Irish homeowners are turning to battery storage to maximise their energy independence. By storing excess solar power for use at night or during peak-rate hours, battery systems are helping thousands of homes cut electricity bills even further.

How many MW of battery storage capacity are there in Ireland?

We currently have more than 300MW of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.

Is battery storage a smart investment?

Battery storage is a smart investment that increases your energy independence and maximises your solar savings. Through SEAI's Home Energy Grants, Irish homeowners can receive up to EUR1,800 towards the cost of installation when combined with a solar PV system.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

What are the key challenges facing battery storage?

It also outlines the key challenges facing the sector, including underdeveloped frameworks and barriers to investment. The study concludes with five policy recommendations designed to accelerate battery storage deployment and ensure energy systems are prepared to integrate high levels of renewable energy.
