Does Texas need solar & battery storage?

Power-hungry Texas needs solar and battery storage to help meet demand and balance the grid, so its largest utility-scale storage operator is delivering. Enel North America has started constructing the Ables Springs Solar + Storage Project in Kaufman County, near Dallas.

Did solar and battery storage increase Texas' electric grid capacity?

Last year, solar and battery storage installation led capacity growth within Texas' electric grid, according to research from the Federal Reserve Bank of Dallas published in January. Texas added nearly 1,500 megawatts of battery storage to the grid's summer rated capacities in 2023.

How much battery storage did Texas add in 2023?

Texas added nearly 1,500 megawatts of battery storage to the grid's summer rated capacities in 2023. That figure almost tripled to 4,374 megawatts added in 2024, according to the report. Capacity from solar power added to the grid enjoyed a similar trajectory.

Does Texas have more battery storage?

Excluding California, Texas has more battery storage than the rest of the United States combined, accounting for over 32 percent of all the capacity installed nationwide. Source: U.S. Energy Information Administration; nameplate capacity. Several factors contribute to this growth.

What makes Texas a good place for battery storage?

Fast permitting processes and a vast amount of land -- mainstays of Texas' low regulation, business-friendly environment and the same features that have allowed wind and solar power to thrive in Texas -- make it easier for developers to enter the battery storage market.

What is a battery energy storage system?

Enter battery energy storage systems (BESS). When intermittent energy sources like wind and solar go offline, batteries can release stored energy and provide greater reliability and stability to the Electric Reliability Council of Texas (ERCOT) system.

6 &#0183; About SunChase Power Since its founding in 2015, SunChase Power developed a utility scale renewable energy portfolio with more than 11.5 GW of solar and 3 GW of battery storage projects located in MISO South, ERCOT ...

Texas nearly tripled its battery storage capacity in 2024, adding 4,374 megawatts, while solar capacity grew to nearly 9,700 megawatts. The state's independent grid operator, ERCOT, is incorporating more battery storage to help manage ...
