

Best tariff for solar battery

What is the best electricity tariff in 2025?

There's no single best electricity tariff in 2025, only the right one for your specific setup and lifestyle. Got solar panels and a battery? You'll be best off with a tariff like Octopus Flux. This has a cheap overnight rate for charging your battery and a generous export rate during peak hours.

How much does a solar & battery tariff cost?

This tariff offers a 25p per kWh rate - but there are many strings attached. First, you have to pay for a solar & battery installation carried out by either Good Energy Solar or JPS Renewable Energy - which the supplier acquired in 2024 - and sign up to a Good Energy import tariff, too.

Do you qualify for a short-term solar tariff?

To qualify, you have to get your solar panels and battery through the supplier - but once the initial 12-month export contract ends, you'll be rolled onto a lower tariff. Here are the three most high-profile short-term tariffs, though one of them has now concluded, as temporary rates do. 1. Good Energy Solar Savings Exclusive

Is it worth getting on a solar tariff?

It's worth getting on board, as hundreds of thousands of households have discovered. 283,666 solar installations signed up to a tariff between April 2023 and March 2024, according to Ofgem's Annual Report - three times more than the previous year.

Why should you buy a solar battery?

A battery allows you to use more of your solar electricity, take full advantage of time of use tariffs, and sign up to the best export tariffs. That explains why 73% of UK households with solar panels also have solar batteries, according to certification body Flexi-Orb - equating to more than a million homes.

How do I get on the electricity tariff?

To get on the tariff, you need to have solar panels and battery storage - any makes will do. There are three rates and time slots for importing electricity, and three rates and time slots for exporting electricity, as laid out in this table (exact rates depend on your postcode): So, what do you do in practice?
