

## Bmax in energy storage inverter

How do Ingecon Sun Storage Power- Max B series inverters work?

The INGECON Sun Storage Power- Max B Series inverters usually work in combination with Ingeteam's INGECON Sun PV inverters and INGECON Sun EMS Plant Controller. With such a schema both inverter types (PV and battery) could inject active and reactive power into the grid at the same time, resulting in a much more efficient system.

What is Ingecon Sun Storage Power Max?

The INGECON Sun Storage Power Max is a three-phase bidirectional battery inverter for grid-connected systems. This inverter offers a high-power density in a single power block, providing different configurable operating modes. Besides, it features the same technology as Ingeteam's PV inverters, facilitating the supply of spare parts.

Which battery inverter is best for commercial self-consumption installations?

Ideal solution for commercial self-consumption installations. Three-phase battery inverter with 100 kW of rated power for industrial self-consumption systems. Ingeteam has achieved the EcoVadis Gold Medal, a recognition that places it among the world's leading companies in sustainability.

What is a battery inverter?

Battery inverter for utility scale application directed at AC-coupled energy storage systems. MV turnkey solution up to 7.65 MVA, with all the elements integrated on a full skid, equipped with one or two INGECON Sun Storage 3Power C Series inverters.

Why do I need a battery inverter?

The energy stored in the batteries could be used to reduce the peaks of power consumption, for those installations with loads coupled to the system. In the event of an underfrequency, an additional power injection is needed. The battery inverter will provide this extra power for a certain period of time.

What temperature should an Ingecon solar inverter be used at?

Heating kit, for operating at an ambient temperature of -30 °C (-22 °F). The INGECON Sun Storage Power- Max B Series inverters usually work in combination with Ingeteam's INGECON Sun PV inverters and INGECON Sun EMS Plant Controller.
