

Botswana energy storage plant

Where can I find information about energy access in Botswana?

Find relevant information for Botswana on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the TrackingSDG7 Botswana Page. The page covers Sustainable Development Goal indicators 7.1 energy access, 7.2 on renewable energy and 7.3 on energy efficiency.

Does Botswana utilize solar energy?

Botswana has one of the highest levels of solar insolation in the world, but until recently, there were no reports of significant use of solar energy. However, as of September 2012, the first solar power generation plant in the country has been opened. The Botswana Renewable Energy Conference was held on 11-12 August 2014.

What is the energy situation like in Botswana?

Botswana's energy sector is a growing industry with significant potential. Almost all of Botswana's electricity is generated from coal. There are no identified petroleum reserves, and all petroleum products are imported and refined, primarily from South Africa. Botswana also has an extensive supply of woody biomass, ranging from 3 to 10 tons per hectare.

Can Botswana meet its energy needs in 2021?

According to the International Renewable Energy Agency (IRENA), Botswana could meet 15% of its energy needs in 2030 from its indigenous solar, wind, and bioenergy resources. (2021 evaluation)

Which power stations are located in Botswana?

Botswana is home to several power stations, including Morupule Power Stations B (600 MW) and A (132 MW), Orapa Power Station (90 MW), and Phakalane Power Station (1.3 MW).
