

Will Brazil install a battery energy storage system in 2024?

A study by Brazilian consultancy Greener has indicated that the country installed 269 MWh of energy storage capacity in 2024, growth of 29% from 2023. Demand for battery energy storage system (BESS) components grew 89% in Brazil from 2023 to 2024 and most of the resulting systems are likely to be installed in 2025.

How will energy storage regulation shape Brazil's energy future?

By advancing energy storage regulation, the agency seeks to enhance system efficiency, accommodate renewable energy growth, and empower stakeholders across the energy sector. ANEEL opens the second phase of Public Consultation on energy storage regulation to shape Brazil's energy future.

Are battery storage systems viable in Brazil?

In Brazil, the cost of turn-key battery systems is notably high due to significant tax burdens. However, future projections indicate a potential reduction in battery costs, which could enhance economic feasibility for various applications. The booklet explores the viability of battery storage systems across different scenarios. For instance:

What are electricity storage technologies in Brazil?

In general, electricity storage technologies are in their initial stage in Brazil. In 2016, the national regulatory body for electricity (ANEEL) selected twenty-three R&D projects that span a diverse range of technologies that includes batteries.

Why is electricity storage important in Brazil?

Electricity storage in Brazil The rise of renewable intermittent sources and the fall of stored energy in hydropower dams raises the risks associated to power security, but it can also pave the way for new technologies such as electricity storage .

How can storage technologies support renewable generation in Brazil?

Connecting storage technologies to renewable sources of electricity can support short-term generation stability and engagement in services that a stand-alone renewable generation asset cannot, but the current regulatory framework in Brazil needs to advance for this to become a viable option.
