

Will Australia's first energy storage system be operational by 2026?

EnergyAustralia is actively pursuing the development of Australia's first four-hour utility-scale battery, the Wooreen Energy Storage System, with a capacity of 350 MW, set to be operational by 2026 in Victoria's Latrobe Valley. This project highlights the company's commitment to advancing energy storage solutions.

What are the future opportunities for energy providers in Australia?

In terms of trends and opportunities, the development of advanced batteries and the increasing commercialization of compressed air energy storage technology is expected to provide new opportunities for providers in the Australian market.

Will Australia's first battery be 350 MW by 2026?

This project highlights the company's commitment to advancing energy storage solutions. EnergyAustralia has called for expressions of interest in the development of Australia's first four-hour utility-scale battery of 350 MW capacity by 2026 in Victoria's Latrobe Valley, which will be larger than any battery operating in the world today.

Will Australia become a green superpower in 2026?

The Energy Storage Summit Australia returns to Sydney in 2026, continuing to drive conversations around Australia's transition to 100% renewables and its emergence as a global green superpower.

When will battery energy storage systems be available in Australia?

The construction of the grid was anticipated to begin in early 2022 and is expected to be in operation by 2023. Thus, upcoming projects in Australia are expected to boost the demand for battery energy storage systems (BESS) during the forecast period.

How many energy storage batteries are there in Australia?

According to the Clean Energy Council, in 2021, 34,731 energy storage batteries with a combined capacity of 347 MWh were installed in Australia, witnessing a growth of 45.7% compared to 2020.

The Energy Storage Summit Australia took place on 18th and 19th March 2025 in Sydney. On day one, Modo Energy's Country Director Wendel discussed the key trends for battery energy storage in Australia's National Electricity Market (NEM).

2 · Recently, the energy storage cell market has abruptly entered a state of tension. Tight production capacity and rising prices have become challenges faced by the entire industry. Leading brands have successively raised prices, ...
