

Buy solar battery cables

What is a solar cable?

A solar cable is an interconnection cable used in photovoltaic power generation. It interconnects solar panels and other electrical components of a photovoltaic system.

Can I make a custom order for solar panel cables?

Custom orders for solar panel cables are always welcome. We have cable lengths on file for various OutBack Power System panel configurations so feel free to call for a set made to work with a half rack or full rack. Need tools to crimp and cut bulk wire on the job? [click here](#) to see our solar tool page.

What wire do I need for a solar inverter?

The wire (or conductors) listed below includes standard PV wire to connect the leads from the solar panels, or USE-2 or THHN conductors rated for home-run lengths from your array combiner box to your charge controller or inverter charger. And of course, the big gauge cable to connect your batteries to form a bank or from the bank to the inverter.

What kind of wire do I need for a solar panel?

But you have come to the right place to get the right kind of wire for your specific application. The wire (or conductors) listed below includes standard PV wire to connect the leads from the solar panels, or USE-2 or THHN conductors rated for home-run lengths from your array combiner box to your charge controller or inverter charger.

Looking for high-quality wire for your solar panel and battery systems? Look no further than our selection of 4/0-10awg Underground PV Cable and Battery Cables. Our cables are specifically designed for use in solar power systems, ...
