

California energy storage project

Are California's battery energy storage systems going up?

For Immediate Release: October 24, 2023 SACRAMENTO -- New data show California is surging forward with the buildout of battery energy storage systems with more than 6,600 megawatts (MW) online, enough electricity to power 6.6 million homes for up to four hours.

What is the long-duration energy storage project?

The project is the largest grant awarded under the Long-Duration Energy Storage Program, funded by Governor Gavin Newsom's historic multi-billion-dollar commitment to combat climate change. Investing in new technologies such as long-term energy storage will help California achieve its goal of a clean energy system by 2045.

Where can I find information on the energy storage program & projects evaluation RFP?

CPUC staff received comments on the RFI and updated the RFP for release. More information on the energy storage program and projects evaluation RFP can be accessed at Cal eprocure. The energy storage program and projects evaluation Bidders' Library can be accessed here. The CPUC engaged Lumen Energy Strategy, LLC to conduct the study.

What is the CEC long-duration energy storage program?

The grant was awarded to International Electric Power through the CEC's Long-Duration Energy Storage Program, which is funded by Governor Gavin Newsom's historic multi-billion-dollar commitment to combat climate change.

What did the energy storage rulemaking entail?

This rulemaking identified energy storage end uses and barriers to deployment, considered a variety of possible policies to encourage the cost-effective deployment of energy storage systems, including refinement of existing procurement methods to properly value energy storage systems. This rulemaking resulted in two CPUC Decisions, which are:
