

# California solar battery incentives

Are solar batteries cheap in California?

Solar batteries also qualify for the federal solar tax credit, so battery installations in California are about as cheap as they come. California's Self-Generation Incentive Program (SGIP) is a tiered rate structure incentive that provides rebates statewide for battery storage projects based on the capacity of the battery installed.

Does California offer a Sgip rebate for home battery storage?

Home battery storage is crucial for backup storage and maximum solar savings in California -- and the Self-Generation Incentive Program (SGIP) rebate is designed to help lower the cost. With fresh funding in 2024, a majority of Californians are eligible for a \$1,500 SGIP rebate when they install an average-sized battery (10 kWh).

Are California solar incentives a good idea?

But incentives like the federal solar tax credit and SGIP rebates are making home solar more affordable in California. If you want to save on solar panels for your home, keep reading. We've rounded up the best California solar incentives for 2025.

What is California's Solar Rebate program?

Rebate amount: Up to \$1,000 per kWh. Savings: Can cover nearly 100% of the battery system cost--making storage essentially free for many qualifying families. Starting June 2, 2025, California is rolling out a new \$280 million incentive specifically for low-income residents installing paired solar and battery systems:

What are the best home battery incentives?

One of the best home battery incentives in the country is California's Self-Generation Incentive Program, or SGIP, rebate. It benefits homeowners who want to install a home battery with their solar panels, and typically covers about 15-20% of an average battery's cost.

Can you get a rebate for installing a solar battery?

The California Public Utilities Commission's Self-Generation Incentive Program (SGIP) offers rebates to residents for installing a solar battery along with the solar panel. The rebate amount varies depending on battery storage capacity and the local utility company.
