

Cheapest sodium ion battery storage installation offer in Belgium

Why should you choose a sodium ion battery?

Crucially, compared to competitors, our voltages are similar to Lithium cells NMC and LFP, for drop-in replacement compatibility! Introducing the Next Generation of Battery Storage: Our sodium-ion batteries deliver lithium-level performance with zero reliance on critical materials, making them both sustainable and resilient to supply shocks.

Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations and reduced use of materials.

Who is eligible for the battery subsidy project in Flanders?

People who own a grid-tied battery system in Flanders is eligible for the project, companies are excluded. Per connection (EAN number) eligible for only 1 subsidy every 10 years. ?A bi-directional, digital meter is necessary.
