

China's energy storage development investment ratio chart

Does China invest in energy storage technology?

Overall, this study is a further addition to the research system of investment in energy storage, which compensates for the deficiencies in existing studies. The Chinese government has implemented various policies to promote the investment and development of energy storage technology.

What is the investment threshold for energy storage in China?

At this stage, the investment threshold for energy storage to involvement in China's peaking auxiliary services is 0.1068 USD/kWh. In comparison, the current average peak and off-peak power price difference in China is approximately 0.0728-0.0873 USD/kWh.

Can China scale up energy storage investments?

This study explores the challenges and opportunities of China's domestic and international roles in scaling up energy storage investments. China aims to increase its share of primary energy from renewable energy sources from 16.6% in 2021 to 25% by 2030, as outlined in the nationally determined contribution .

How much did China invest in energy in 2021?

In 2021, global investments amounted to \$755 billion, of which China's domestic investments in the energy transition, mostly in renewable energy and electrified transport, increased by 60%, reaching a new height at \$266 billion.

Should energy storage be invested in China's peaking auxiliary services?

Therefore, direct investment in future energy storage technologies is the best choice when new technologies are already available. At this stage, the investment threshold for energy storage to involvement in China's peaking auxiliary services is 0.1068 USD/kWh.

What is China's energy storage capacity?

China's energy storage capacity accounted for 22% of global installed capacity, reaching 46.1 GW in 2021 . Of these, 39.8 GW is used in pumped-storage hydropower (PSH), which is the most widely used storage technology.
