

Coleman solar power battery display

Does the Coleman charge controller work with GEL cell batteries?

The easy-to-read digital display indicates charging status and battery voltage. Compatible with an array of Coleman panels, this charge controller works with both lead acid and gel cell batteries to keep your solar panel operating safely and efficiently. This product carries a 1 year exchange warranty redeemable at any Canadian Tire store.

Can a solar panel charge a 12V battery?

The solar panel is designed to charge 12V batteries such as the ones used in RVs, cottages, emergency power systems, and more. The included 8.5A solar charge controller prevents the 12V battery from overcharging.

Does a solar panel protect a 12V battery from overcharging?

The included 8.5A solar charge controller prevents the 12V battery from overcharging. The panel is fully weather-resistant and comes with shatterproof tempered glass, aluminum frame and integrated blocking diode that protects the battery from discharge at night.

Does a charge controller work between solar panels & battery?

A: No, the charge controller is between the solar panels and the battery not between the battery and load. CT has another device that they sell which monitors battery voltage and will shut off the load if the voltage drops too low. I had one on a car, was merrily driving along and all of a sudden the power cut out.
