

Which companies are advancing solid-state battery technology?

Scaling production and reducing costs are key challenges before introducing it into the EV market. This week, EV Magazine highlights the top 10 companies advancing SSB technology. Nissan, the Japanese multinational automaker, is actively advancing solid-state battery technology to enhance its EV line-up.

Who makes solid-state batteries?

Contemporary Amperex Technology Co., Limited (CATL), the world's largest lithium-ion battery manufacturer, is making significant strides in solid-state battery development. With more than 1,000 researchers dedicated to the technology, CATL has invested in solid-state batteries for nearly a decade.

What is the future of the solid-state battery industry?

Looking ahead, the future of the solid-state battery industry is not just promising--it is poised for transformative growth. According to a report by Market Research Future, the global solid-state battery market is expected to grow at a CAGR of 28% from 2022 to 2030, reaching a market value of approximately \$6 billion by the end of the decade.

Is solid-state battery technology a game-changer for the EV industry?

Solid-state battery technology is being hailed as a potential game-changer for the electric vehicle (EV) industry. It promises significant advantages over traditional lithium-ion batteries, including better energy storage, faster charging times, and improved safety.

Is Toyota developing solid-state battery technology in-house?

Toyota is among the automotive giants investing in developing solid-state battery technology in-house. Toyota, in particular, has made notable strides in solid-state battery technology, evidenced by their application for over 1,000 patents in this area.

Is solid-state battery technology the future of electric vehicles?

Renault is actively engaged in the development of solid-state battery technology, viewing it as a critical factor in the future of electric vehicles (EVs). This technology has the potential to address some of the key limitations of current lithium-ion batteries, such as driving range and charging times.

Iluka Plc is known for developing solid-state batteries for various applications such as MedTech, Industrial IoT, EVs, and Consumer Electronics. It has partnered with major companies like Shell, Toyota, Murata, and other leading brands to ...

The company has a roadmap for the release of at least 150+ GWh of battery cells for commercialization by 2028. While spearheading the solid-state battery technology drive, the company has released its Titan Silicon
