Can I add a battery to my solar system?

So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options. Let's explore how easy it is to add a battery to your existing solar setup and what options you have based on your current equipment.

Can you add a battery to a solar inverter?

It's relatively easy to add a battery to your existing solar panel system, but the level of ease depends on the type of solar inverter you have. If your inverter isn't compatible with a battery, the simpler and more affordable solution is to install an AC-coupled battery system.

Are solar batteries compatible with existing solar panels?

Most solar batteries designed for small-scale use are compatible with existing solar panel systems. The best battery for your retrofit installation really comes down to your unique needs and reasons for installing an energy storage system.

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.

How does a solar panel work?

A solar panel (or any other renewable power source) charges a storage battery. A control circuit continuously monitors the battery's voltage. When the battery is fully charged, the circuit automatically turns on a power inverter and switches the appliance from running on grid power to running on the energy stored in the battery.

How do solar electric hybrids work?

This project is a simple and cheap way to integrate renewable energy into your home by turning your appliances into solar electric hybrids. Here is how it works. A solar panel (or any other renewable power source) charges a storage battery. A control circuit continuously monitors the battery's voltage.

1. Mount your Solar Panel to a wall or flat surface, following the instructions in the included manual.
2. Remove the rubber plug from the upper rear of your Stick Up Cam Battery.
3. Plug your Ring Solar Panel into your Stick Up Cam Battery.
4. ...
