

# Cost for solar power per kwh

What is the average cost of a 5 kw solar power system?

A typical 5 KW solar power systems may cost up to \$40,000. You may think the initial input is huge, but it comes to about 25 cents per KWH in the long run. Generally, solar power systems come with at least 5-year warranty if they are installed by a professional. Once they were installed, they can generate electricity for 30 years.

What is the cost of solar power?

A typical 5 KW solar power systems may cost up to \$40,000. You may think the initial input is huge, but it comes to about 25 cents per KWH in the long run. Generally, solar power systems come with at least 5-year warranty if they are installed by a professional. Once they were installed, they can generate electricity for 30 years.

How long do solar power systems last?

Most solar panels are warrantied for 20-25 years and last much longer, so we'll assume a 22 year lifespan to be super conservative. Finally, we'll assume 90% efficiency over the 22 years.

We want to install a solar system that will take care of all the electricity needs of our house. That means that (in the US) such a solar system has to produce 10,715 kWh per year. We will first use the solar power calculator to figure out ...
